

## Preventing Chronicity

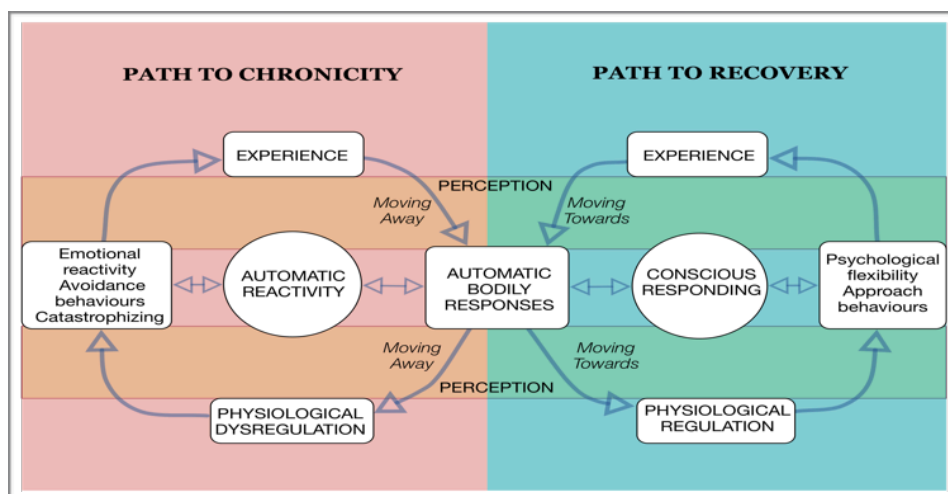

### Table of contents

**WELCOME** Case study

#### **PART 1: SCIENCE OF THE PATH TO CHRONICITY**

**9**

1. Pain is complex
2. Injury and work
3. Features of the path
4. Pain intensity
5. Beliefs
6. Mind states, body responses and behaviours
7. Body
8. Brain
9. Memory
10. Epigenetics
11. Innovative programs
12. Relating to experience model

Early intervention relating to experience framework:

An attentional, body-based intervention to facilitate recovery from injury and assist in preventing chronicity.

<b>PART 2: ATTENTION</b>	<b>37</b>
1. Coming to your senses	
2. Pain's attentional bias	
3. Cultivating body awareness	
4. Body scan	
5. Breathing	
6. Mindful movement	
7. STOP breathing space	
<b>PART 3: PERCEPTION</b>	<b>63</b>
1. Our lens	
2. Reframing perceptions	
3. The physiotherapist's role	
4. Helpful words	
5. Mindful inquiry	
6. Case study: Max	
<b>PART 4: PHYSIOLOGICAL REGULATION</b>	<b>79</b>
1. Flight and fight	
2. Perception of threat	
3. Chronic stress	
4. Assessing stress	
5. Case study: Max	
<b>PART 5: CONSCIOUS RESPONDING</b>	<b>91</b>
1. Velcro for negative	
2. Responding to challenge	
3. Avoidance	
4. Embracing experience	
5. New pathways: A pain hardy body and brain	
6. Case study: Max	
<b>PART 6: LIFE &amp; WORK</b>	<b>109</b>
1. In the clinic	
2. In the group	
3. Explaining body - mind	
4. Enhancing self responsibility	
5. Back to work	
6. You	
<b>PART 7: APPENDICES: Questionnaires: Resources: Bibliography</b>	<b>125</b>
